BEAT-MAN

A NOTE FROM ZANETS

I made some of these beats before I knew what they were for.

They survived old computers, unfinished sessions, and years of being left behind. Somehow, every time I found them again, they still had something to say.

BEAT-MAN isn't about going backwards. It's about taking the sound I started with and finishing it with everything I know now.

I didn't come back to recreate the past.

I came back to finish what I started.
